EPA Adds Viking Pure Solutions to “List N” Approved Disinfectants

Port Orange, FL (November 16, 2020) – Viking Pure is proud to announce its trademarked Disinfectant has been approved by the Environmental Protection Agency (EPA) and added to the List N Disinfectants for use against SARS-CoV-2 (COVID-19).

This recognition by the EPA adds yet another layer of validity to the Viking brand, as our solutions are already GreenSeal Certified, WoolSafe, trademarked and patent-protected, and their potency and efficacy have been attested to by independent lab studies across the country.

The List N certification officially establishes our Hypochlorous Acid (HOCl) as a Hospital Disinfectant. Further, the EPA report verifies the Disinfectant is “multi-purpose,” “hypoallergenic,” and efficacious in “broad-spectrum” use. These citations, along with its demonstrable potency and kill power, make our Disinfectant one of the most formidable water-based solutions on the market.

As the List N Approval notes,

This product meets the criteria to make claims against certain emerging viral pathogens from the following viral categories: Enveloped Virus, Large nonenveloped virus, Small nonenveloped virus...

Additionally, the EPA validated that the Viking solution “leaves no residue,” recognizing our groundbreaking and patent-protected salt-free process, which sets our Disinfectant apart from other corrosive solutions.

VIKING PURE™
SOLUTIONS

Viking Pure believes the reliance on non-harmful, non-carcinogenic disinfectants is critical to our ability to fight back against infectious disease outbreaks while still maintaining safe and breathable spaces for our patrons, employees, friends and families. We are excited to extend the benefits of HOCl across the U.S. market. Viking's customers and partners are proving every day that we have a superior product to the less effective and more hazardous traditional chemical solutions.

As Viking Pure's CEO Robert Slingsby explained, "In this time of great uncertainty, we are honored by the EPA's vote of confidence in the Viking cleaning and disinfection systems. It has been our mission for a long time to reimagine our environments and create new standards of purity for future generations. With Viking Pure's official certification as a List N Disinfectant, that mission takes a big step forward."

The Viking Pure Disinfectant's official EPA Registration Number is 87542-1.

About Viking Pure Solutions

Viking Pure Solutions is a privately owned and operated all-natural cleaning and sanitizing solutions company based in Port Orange, FL.
