

ERIC M. GORDON, DMD • PROSTHODONTICS

Dr. Eric Gordon's practice has evolved to embrace the concept of revitalization in delivering dental health and attractive smiles to his patients. Revitalizing dentistry enhances the appearance and function of teeth, which may have lost their luster due to age, neglect or trauma. This often involves a variety of coordinated disciplines, from simple smile whitening and the replacement of older restorations, to more complex dental veneers, extensive crown and bridgework, or implant dentistry.

A graduate of Fairleigh Dickinson University College of Dental Medicine, Dr. Gordon received his prosthodontics specialty training in a two-year program at NYU College of Dentistry. He also completed a two-year fellowship at NYU in surgical and implant dentistry, concentrating on all phases of dental implant diagnosis, treatment and management.

For more than 15 years, Dr. Gordon was a clinical associate professor in the NYU graduate prosthodontic program. He is currently a clinical professor of prosthodontics in the dental medicine residency program at Monmouth Medical Center. He lectures extensively nationally and internationally on the subjects of dental aesthetics and implant dentistry.

Dr. Gordon donates his time as a team member of the Regional Cleft Palate Center at Monmouth Medical Center. An active member of the American College of Prosthodontics, he is president-elect of the Northeastern Gnathological Society and has also achieved GNYAP fellowship status. Dr. Gordon would like to thank his colleagues for their continued confidence in his abilities as a clinician, teacher, and leader in restorative dental care.
